SUMMARY

Results-driven Data Scientist and Trainer with 1+ year of experience delivering data science training and building machine learning solutions. Skilled in Python, SQL, machine learning, and data visualization. Experienced in mentoring students, developing real-world projects, and creating data-driven solutions that improve decision-making. Seeking Data Scientist roles while open to advanced training positions.

PROFESSIONAL EXPERIENCE & INTERNSHIPS

Data Scientist, Softroniics, Ernakulam, India

May 2025 — Present

- Designed real-world projects including prediction models and dashboards to enhance practical learning.
- Performed data preprocessing and exploratory data analysis (EDA) with Python and SQL to clean, transform, and engineer features for modeling and reporting pipelines.
- Delivered structured training programs in Python, SQL, Machine Learning, and Power BI for 100+ students.
- Conducted code reviews and mock interviews to prepare candidates for data science roles.

Data Science and Gen Ai Intern, Innomatics Research Labs, India (Remote)

Sep 2024 — Dec 2024

- Performed data preprocessing, feature selection, and model training on real-world datasets.
- Built and tuned machine learning models to improve prediction performance and Generated evaluation reports and visualizations to communicate insights.

EDUCATION

Bethlehem Institute of Engineering, Kannyakumari, India - B.E., Computer Science and Engineering - (GPA: 7.3) Jan 2021 — May 2025

B.E. Computer Science and Engineering, Bethlehem Institute of Engineering — 2025, GPA 7.3

CERTIFICATIONS

Data Science and Ai (6Months), AVODHA EDUTECH PVT LTD

Jan 2024

SQL Certification Course — Oracle, Oracle

Jan 2024

Oracle Cloud Infrastructure Certified, Oracle

Jan 2023

Additional training: Front End Development Libraries; Responsive Web Design; Foundations Associate; Soft Skill Development Program

DATA SCIENCE PROJECTS

Insurance Fraud Detection, [Link](#)

- Built Random Forest and XGBoost models improving fraud detection precision by **15%**
- Applied feature engineering and handled class imbalance.
- Improved fraud detection accuracy and precision.

Bangalore Home Price Prediction, [Link](#)

- Developed regression models using real estate data.
- Performed feature engineering and location encoding.
- Evaluated models using RMSE and MAE for reliable predictions.

Car Sales Dashboard | Power BI, [Link](#)

- Created interactive dashboards with DAX measures for revenue and trend analysis.
- Enabled data-driven pricing and inventory decisions.

ATS Resume Expert (Deployable App), [Link](#)

- Built NLP-based resume analyzer using TF-IDF and cosine similarity to match resumes with job descriptions
- Implemented text processing and matching techniques.

SKILLS

Programming & Libraries : Python, Pandas, NumPy, scikit-learn, PyTorch, Git, SQL

Machine Learning : Regression, Classification, Feature engineering, Model evaluation, Hyperparameter tuning, Clustering

Deep Learning : TensorFlow, keras, PyTorch, CNN, RNN

Visualization : Power BI, Tableau, Matplotlib/Seaborn, Streamlit

NLP : NLTK, spaCy, Text Classification, Sentiment Analysis, TF-IDF

Computer Vision : OpenCV, Image Processor

EXTRACURRICULAR ACTIVITIES

- Winner, National Level Technical Symposium; Participant, Smart India Hackathon 2023; Forage simulations (GenAI, Data Analytics, Power BI)
